

- 1. WE HAVE RESTUDIED THE VARIATION OF FOCAL POSITION AND EMULSION POSITION IN OUR SYSTEM. PART OF THIS VARIATION IS THE VARIATION OF FILM THICKNESS.
- 2. THEREFORE, WE HAVE SOME QUESTIONS:
- (A) WHAT IS THE THICKNESS VARIATION IN ANY SINGLE UNSPLICED LENGTH?
- (B) WHAT IS THE THICKNESS DIFFERENCE FROM ONE PIECE TO ANOTHER?
- (C) CAN YOU ARRANGE TO MAKE THIS DIFFERENCE (PARA 2B) VERY SMALL (SAY Ø.ØØØ1 INCH) ON A SINGLE SUPPLY SPOOL OF 5000 FEET HAVING SPLICES?
- (D) CAN YOU MEASURE NOMINAL THICKNESS AND LABEL SUPPLY SPOOL CONTAINER?
- 3. REQUEST ANSWERS WITHIN TWO WEEKS.

END OF MESSAGE
